

TAB A

**'737 reference**

[0033]

Means for resolving the problem:

In order to achieve this objective, the cosmetic product according to the current invention have blended therein as a mineral component, ancient salty water sealed in crustal deep layer.

[0034]

The term "ancient salty water sealed in a crustal deep layer" indicates salty water having been buried in an environment shut off from the external world in depth of the crust in a state sealed in porous coral skeletons of a coral reef for as long as a time as tens of thousands of years through a history of complex crustal alteration including upheaval and subsidence in ancient times.

[0035]

The reason why such ancient salty water is used in the current invention is because, as described above, ancient salty water contains mineral elements essential to life activity, especially a large and well-balanced amount of calcium and magnesium.

TAB B

**'271 reference**

[0029]

Means for resolving the problem:

In order to achieve this objective, the food additive according to the current invention, and food and beverage using the same, have blended therein as a mineral component, ancient salty water sealed in crustal deep layer.

[0030]

The term "ancient salty water sealed in a crustal deep layer" indicates salty water having been buried in an environment shut off from the external world in depth of the crust in a state sealed in porous coral skeletons of a coral reef for as long as a time as tens of thousands of years through a history of complex crustal alteration including upheaval and subsidence in ancient times.

[0031]

The reason why such ancient salty water is used in the current invention is because, as described above, ancient salty water contains mineral elements essential to life activity, especially a large and well-balanced amount of calcium and magnesium.
